## MAMMOMAT Select

# Makes your day the easy way

Providing access to mammography and therefore to early breast cancer detection can be a challenge when budgets are limited. An analog system that is easy to use and provides images with the right dose, is a cost-effective way to provide women with professional care.

MAMMOMAT Select is a system that is the outcome of more than 30 years of expertise in analog mammography. Enhanced with smart features for ease of use, the right dose and low total costs of ownership, it will help you give more women access to high-quality mammography.

In short, with MAMMOMAT Select, you are able to offer more women worldwide access to mammography in keeping the required standard of care.

### Easy to touch screen

Features like EasyTouch and isocentric rotation allow you to streamline your workflow.

### Easy to dose right

Personalized OpDose with Automatic Exposure Control makes individually selecting the right dose for each woman very simple.

### Easy to invest low

MAMMOMAT Select comes with an affordable price tag, low service costs and enables high patient throughput.

Discover how these attractive features can significantly improve your daily screening and diagnostics. Because detail matters in mammography.

## Easy to touch screen

Reduce staff training requirements to a minimum with the EasyTouch user interface.

### Clear and compact controls

The intuitive EasyTouch allows full access to the exposure controls from a single compact console, either with the integrated radiation shield or from a separate control room.

### Automated procedures

EasyTouch comes with intuitive symbols and the next workflow step is highlighted, allowing for easy operation throughout the entire mammography exam. Individual changes for each patient, such as chamber selection, are possible at the touch of a button.

### User-defined configuration tabs

You have full access to the system configuration and can directly change the dose settings, exposure light levels, compression force and more with just one touch.

## Easy to dose right

Give each and every patient the same high standard of care with dose saving features that keep exposure to a minimum.

### OpDose with one touch

OpDose can be selected on the intuitive EasyTouch with a single tap. It works quickly and easily in every position and view.

### The right dose for every woman

OpDose uses breast thickness and Automatic Exposure Control (AEC) measurements to achieve optimal image quality for each woman at the right dose.

## Easy to invest low

Reduce the total cost of ownership with a system with compact space requirements, easy installation and flexible service packages.

### High throughput

Isocentric rotation and fully motorized system movements enable fast positioning, and, combined with the efficient EasyTouch, let you increase patient throughput.

### Flexible configuration

The compact design and integrated generator reduce space requirements. The ability to configure the system with a Mo/Mo or Mo/Rh anode-filter combination<sup>1</sup> and an 18 × 24 or 24 × 30 cm bucky table allows you to install the system according to your needs.

### Expanded applications

MAMMOMAT Select offers options such as magnification, spot imaging, 2D biopsy and a range of compression plates for flexible positioning. The interfaces for a Film ID camera or CR reader further increase the scope of possible applications.

EasyTouch allows easy operation at the touch of a button.

## Why Siemens Healthineers?

At Siemens Healthineers, our purpose is to enable healthcare providers to increase value by empowering them on their journey toward expanding precision medicine, transforming care delivery, and improving patient experience, all made possible by digitalizing healthcare.

An estimated 5 million patients globally benefit every day from our innovative technologies and services in the areas of diagnostic and therapeutic imaging, laboratory diagnostics, and molecular medicine, as well as digital health and enterprise services.

We are a leading medical technology company with over 120 years of experience and 18,000 patents globally. Through the dedication of more than 50,000 colleagues in 75 countries, we will continue to innovate and shape the future of healthcare.

## Service and exchange

Increasing value by partnering throughout the entire equipment lifecycle

### Equipment Maintenance & Monitoring

Reliably servicing your MAMMOMAT Select allows you to identify deviations from current norms to maximize equipment availability.

### Education Management

Personalized education and training improves your staff's expertise as well as your equipment efficiency.

### Fleet Management

A transparent overview of your fleet allows you to manage the performance and maintenance of your Siemens Healthineers equipment, 24/7.

### Accessory Solutions

Products from our partner companies complement your use of our equipment in your daily workflow.

### Performance Management

An intelligible overview of your radiography performance data helps you make prompt and well-informed decisions.

### Asset Management & Planning

Access to innovative medical technology and equipment throughout the entire contract life-time allows you to maximize focus on patient care.

### Business Modelling & Financing

Customized business and financial models address your budgetary and enterprise needs enabling you to remain more competitive.

### Departmental Layout Optimization

3D-Visualization and digital twin analysis create more efficient workflows and a more enjoyable working environment.

Continuously adding value and caring for your equipment, your staff, your fleet, your workflows, your department, and your entire institution.

## MAMMOMAT Select

# Makes your day the easy way

### Fully motorized system movements

enable quick positioning – at the touch of a button

### Personalized OpDose with AEC

individually selects the right dose for every woman

### Tube with anode-filter combination

lets you choose between a Mo/Mo or Mo/Rh combination<sup>1</sup>

### Seamless isocentric rotation

enables rapid positioning for the next view without changing detector height

### Compact installation

and reduced space requirements due to integrated generator

### Flexible configuration

with an 18 × 24 cm or 24 × 30 cm bucky table as well as magnification, spot and 2D biopsy options

### EasyTouch

allows easy operation at the touch of a button
